3rd International Scientific Conference

Sustainability Challenges in Agroecosystems

June 19 – 21, 2017 – Osijek, Croatia

Organizers:

CROSTRO – Croatian Soil Tillage Research Organization (branch of ISTRO), Osijek, Croatia
Czech branch of ISTRO, Brno, Czech Republic
HUISTRO – Hungarian branch of ISTRO, Gödöllő, Hungary

Under the auspice of:

ISTRO – International Soil Tillage Research Organization

Supportive Institutions:

Ministry of Agriculture of the Republic of Croatia
Ministry of Environment and Energy of the Republic of Croatia
Ministry of Science and Education of the Republic of Croatia
Croatian Academy of Sciences and Arts
Faculty of Agriculture in Osijek, Croatia
Faculty of Agriculture in Zagreb, Croatia
Meteorological and Hydrological Service of the Republic of Croatia
Nature Park Papuk, Croatia

Scientific Committee:

President
Irena JUG, Croatia
Secretary
Boris ĐURĐEVIĆ, Croatia
Members
Ferdo BAŠIĆ, Croatia
Dušan KOVAČEVIĆ, Serbia
György VÁRALLYAY, Hungary
Blair MCKENZIE, Great Britain
Rainer HORN, Germany
Franc BAVEC, Slovenia
Lars J. MUNKHOLM, Denmark
Donald D. TYLER, United States of America
Darko ZNAOR, Croatia
Srđan ŠEREMEŠIĆ, Serbia
Jerzy LIPIEC, Poland
Steinberger YOSEF, Israel
Željko DOLIJANOVIĆ, Serbia
Jan KŘEN, Czech Republic
Milan MACÁK, Slovakia
Vera CESAR, Croatia
Josef ROSNER, Austria
Zoran DIMOV, Macedonia
Laura ALAKUKKU, Finland
Ilija KOMLJENOVIĆ, Bosnia and Herzegovina
Marijana TUCAK, Croatia
Ljubica RANOGAJEC, Croatia
Jan TURAN, Serbia
Margarita NANKOVA, Bulgaria
Teodor RUSU, Romania

Organizing Committee:

President
Danijel JUG, Croatia
Members
Jean Roger ESTRASSE, France
Vladimír SMUTNÝ, Czech Republic
Márta BIRKÁS, Hungary
Vlado GUBERAC, Croatia
Ivica KISIĆ, Croatia
Marko JOSIPOVIĆ, Croatia
Vesna VUKADINOVIĆ, Croatia
Silvio KOŠUTIĆ, Croatia
Karolina VRANDEČIĆ, Croatia
Dubravko FILIPOVIĆ, Croatia
Bojan STIPEŠEVIĆ, Croatia
Ivan PLAŠČAK, Croatia
Andrija ŠPOLJAR, Croatia
Igor BOGUNOVIĆ, Croatia
Bojana BROZOVIĆ, Croatia
Branka KOMESAROVIĆ, Croatia
Roberta SORIĆ, Croatia

Guest Editors:

Danijel JUG, Croatia
Irena JUG, Croatia
Boris ĐURĐEVIĆ, Croatia

Editorial Note

3rd International Scientific Conference “Sustainability challenges in agroecosystems” was held under joint organization of CROSTRO (Croatian Soil Tillage Research Organization), Czech branch of ISTRO and HUISTRO (Hungarian branch of ISTRO) under the auspice of ISTRO (International Soil Tillage Research Organization), and many others supportive institutions, from 19th-21st June, 2017, Osijek, Croatia.

Since the establishment of our national branches, Croatia, Czech Republic and Hungary are going to organize for the first time a joint Scientific Conference as a Central Europe Division of ISTRO initiative (CEDSTRO). Place of the first joint Conference was Osijek, Croatia, whereas following joint Conferences will be held in other two countries (Czech Republic and Hungary) in the rotation after every three years.

At conference has attended over 100 scientists-participants from 25 countries (Austria, Belgium, Bosnia and Herzegovina, Bulgaria, China, Croatia, Czech Republic, Denmark, Finland, France, Germany, Hungary, Israel, Luxemburg, Macedonia, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, United Kingdom, Uruguay, USA), with 58 papers divide on 5 main topics / session, as follows: 1. Sustainable land management, 2. Coping with climate changes in plant production, 3. Good agriculture practice and food safety, 4. Precision agriculture, mechanization and renewable bioenergy, 5. Facilitation of integrated crop protection.

Since climatic changes do not follow national borders and since agriculture is extremely vulnerable to them, a common action to find adequate and effective measures to face climatic changes is an imperative. Conservation agriculture is one of the possible ways to combat many negative challenges primarily influence of climatic changes. This technology is not novelty in Europe, but it's application is usual because of economic reasons (cheaper production) or as an alternative system. Conservation agriculture includes three main bases for sustainable and successful agriculture production in relation to agro-ecological conditions, namely: minimal set of soil tillage treatments (minimal soil disturbance), permanent soil cover (with crop or crop residue) and diversification in crop production, predominantly crop rotation. At this moment, the application of conservation agriculture in the Central-South-East Europe (as in whole Europe) is still very heterogeneous and persists on different levels and with different success in each country of the region. As soil tillage is closer to conservation agriculture principles, we are step-closer to sustainability and we can expect less damages less potential problems and less risks in crop production.
